

LIBERIA TELECOMMUNICATIONS AUTHORITY

NOTICE

Unauthorized Dealers of Starlink Products & Services

(MONROVIA, NOVEMBER 5, 2024) The Liberia Telecommunications Authority (LTA) has observed that certain individuals and businesses are illegally promoting, marketing and selling Starlink products and services in Liberia, and in some instances are claiming to be authorized Starlink dealers.

The public is informed that the LTA has not authorized any individual or business to provide telecommunications services using Starlink products and services. While the LTA has granted a provisional license to Starlink, their services in Liberia will commence only after the official launch.

The LTA hereby gives notice to all unauthorized Starlink dealers, marketers, promoters, and resellers to cease and desist from fraudulently offering Starlink products and services to the public. Engaging in such activities is prohibited and those doing so will face legal consequences.

The LTA remains committed to protecting consumers and safeguarding telecoms markets and will take all necessary measures against violators. The public is therefore advised that transacting with unauthorized Starlink dealers is at their own risk.
